

4.4 FIRE-FIGHTING WATER CONTAINER KPP container

KPP water container has been designed for storing and supplying water to forest areas in times of a fire hazard to support fire-fighting. This set is equipped in connections enabling for filling and draining using external motor pumps. The container is assembled on a platform that is purposed to be transported on a hook trailer (PH trailer).

External connectors allow for an application of a wide variety of fire-extinguishing pumps.
