

FOREST PROTECTION

4.6 FOREST FIRE EXTINGUISHING AND RESCUE SET LZRG200 set

LZRG400 set has been designed for extinguishing small A- and B-group fires using a uniform or sprayed flow of water and heavy extinguishing foam, fed under high pressure of 40 bar.

The set consists of:

- light car trailer - carrying capacity 560 kg,
- fire extinguishing module (engine, pump, hose reel and container)
- additional equipment assembled to the trailer or the fire extinguishing module.

LZRG400 set has been designed in a way that after disassembling the fire extinguishing module using a trolley that is a part of the set, the trailer may be used to transport other cargo like seedlings or game trophies (equipment for game transport).

TECHNICAL PARAMETERS

Parameter	Value
Total permissible weight	750 kg
Payload	560 kg
Load area	2040x1720x880mm
Trailer's total length	3440 mm
Jet type	compact, sprayed, heavy foam extinguisher
Jet pressure	40 bar
Pump efficiency	55 l/min
Tank capacity	200l
Foam concentration adjustment	0 to 10%
Hose reel	50m
Engine	4-stroke petrol engine
Additional equipment	Shovels, axes, foam container, etc.
